Program Description

Most programmers will tell you that one of the ways to improve your performance in competitive programming is to practice a lot of problems.

Ben took the above advice very seriously and decided to set a target for himself.

Ben decides to solve at least 10 problems every week for 4 weeks and took an oath to do that.

Given the number of problems he actually solved in each week over 4 weeks as P1, P2, P3, P4, determine if he fulfilled his oath or not.

Input Format

A single line contains four numbers P1, P2, P3, P4.

Output Format

Print the output YES or NO.
